See Definitions section for description of the type of diagnosis that fall into each MDC.

Claims by Major Diagnostic Category (Graph)

LHS EMPLOYEE BENEFIT TRUST

All possible diagnosis are grouped into 19 Major Diagnostic Categories (MDCs) by the American Medical Association. We've analyzed your company's total charges by MDC. This data reflects fees charged by facilities, physicians, and other healthcare providers. We suggest you use this MDC analysis to form a basis for determining the appropriate form of management intervention. Working together, we can target the areas within your plan where cost is highly concentrated. Using services such as medical management, disease management and Nurse 411 may help you focus on controlling these high cost categories.

Please see following page for more detailed information on the claims by Major Diagnostic Categories.

Analysis of High Cost Claimants

The ten highest cost claimants are depicted in this report. This information reveals that a small number of plan participants can often be responsible for a significant percentage of total claim dollars. Along with the Major Diagnostic Categories, this analysis can help you assess the diagnoses associated with the high cost claims among your participants. General health risks and disease conditions can be identified herein, and if tracked over several years, will allow your company to pursue plan management tactics that address these areas of concern. Disease management may be appropriate options to include in your plan design to help control costs in these areas.

Claims Analysis:

In this comparison we look at the average issued employee and dependent claims as a percentage of total. As with any statistical comparison, percentages can be skewed if there are cases of a few ill dependents or employees on the plan.

*Participation is based on the average participation for the stated period of time.

**Other: Disabled dependent child who is over the maximum age limit for dependent children as defined by the Plan Document.
